

OUTLOOK EXPRESS BACKUP EXPERT

- DATASHEET -

Outlook Express Backup Expert is an award winning email backup tool that helps you to create easily Outlook Express backup copies for your emails.

How does OUTLOOK EXPRESS BACKUP EXPERT work?

Once installed, our software gives you the opportunity to choose from two different work mode: a standard mode and a wizard mode. Before making a backup, you have to set up some necessary functions in order to make the process work (ex.: select the items to be backed up, the folder where to be backed up, the maximum size of the back up file, and more). After all these operations, the user is ready to create the needed backup file.

At the finish of the backup, the user can choose to send it via internet to a FTP server or, in case of using Windows XP, write it to a CD.

KEY FEATURES:

- Backup support for: mail & attachments, account settings, rules, address book, block sender list, stationery, general settings
- Multiple compression levels
- Multilanguage support
- Support for Outlook Express 4, 5, 6
- Write backups to CD
- Upload backups to FTP servers
